

SAMSUNG

Samsung Galaxy S10

The super-powered, intelligent business phone.

The Samsung Galaxy S10 range of powerful smartphones is the culmination of a decade of S series innovation. Available in three models, the S10+, S10 and S10e are packed with innovative features and tools to help your customers work seamlessly, wherever they go. Viewing and updating documents is easy on the stunning, large display. And with the True Vision Camera, users can capture notes and pictures in fine detail, then share them instantly. Plus, the fingerprint scanner and Knox defence-grade security make the S10 range ideal for secure working on-the-go.

How does it meet customer challenges?

“I can’t always get to a charging point, so my battery dies.”

With a powerful, long-lasting battery, Galaxy S10 range phones are able to keep up with your customers’ busy schedules. When they do need an extra boost, Fast Charging gets them back to full power quickly—or just enough to tackle their next task. And with Wireless PowerSharing, they can even use their phone to power their wearable or charge a colleague’s drained phone battery.

“The screen on my phone is too small to see work documents in enough detail.”

Infinity-O Display on the Galaxy S10 range helps your customers see photos, diagrams and documents in greater detail. With no home button or receiver notch, it provides an uninterrupted view. If your customers want to view on an even bigger screen, Samsung DeX lets them connect their phone to a monitor with a single cable¹ for a PC-like experience.

“My phone is too slow, so I can’t work productively on-the-move.”

With a fast, powerful processor, Galaxy S10 phones make it easier for your customers to get more done while working on-the-go. Apps open in a flash, and users won’t be slowed down by buffering or frozen screens. Instead, they’ll be more productive wherever they are—able to update documents, video conference or capture notes and pictures, then share them instantly.

“I don’t want anyone guessing my phone code and accessing my data.”

The Galaxy S10 range comes with Knox defence-grade security built-in to protect your customer’s business files and data. It also features an Ultrasonic Fingerprint Scanner², which reads every ridge and notch of a user’s finger to ensure only they can gain access to their phone’s information.

Wireless PowerShare
Power to share
